Abstract of the Disclosure

[The invention relates to a] A contact protection housing for at least one electrical terminal that is disposed in a housing part [(7) which is] mounted on a component [(1)] and in which an opening [(8)] for introducing potting composition is made. The invention also relates to an injection pump, having a contact protection housing as described above, and to a method for mounting a contact protection housing, with an adapter. [To reduce the effort and expense of assembly, the] The housing part is formed by a thin-walled cap [(7)], whose edge rests constantly on the component [(1)] by initial tension.
